

The Original Monogrammed Cutting Boards™

Thank you for your interest in our line of cutting boards and accessories. We make one of the finest lines of cutting boards available and then personalize them to your taste. The boards are proudly crafted in America from Walnut or Maple. The lighter colored wood is Maple and the darker is Walnut. The Walnut boards are shipped pre-oiled for a spectacular finish. Cutting boards are made from thin strips of wood and glued together with a waterproof glue. We add the rubber feet with stainless steel screws so the board will not slip on the counter.

Below are three of our bread boards. We personalize the boards in two different ways. They are either laser engraved or carved with a computer-

ized router. Each board can be personalized with up to nine letters and this is available on all boards. The laser engraving allows us to apply even very intricate logos, personalized messages on the back of the boards or simply names as on the Sue and Mike below. On page four you will see some of the “stock” designs in laser that we offer.

What we are offering is basically “Build a Board.” You pick the board, choose the handles that are offered on that board is you wish, add a single letter, a three letter monogram or even last names, and then add a personalized message or a corporate logo. We cannot show all the possibilities here in the catalogue so please call or email to discuss your personal or corporate needs.
